3. The Centers for Disease Control and Prevention added six symptoms of the novel coronavirus to its list, suggesting health experts are learning more about the growing number of ways physicians see the virus affecting patients. The symptoms, which the CDC reports could appear two to 14 days after exposure to the virus, are: Chills, Repeated shaking with chills, Muscle pain, Headache, Sore throat, New loss of taste or smell. Previously, the CDC listed just three known symptoms: shortness of breath, cough and fever. Source: <https://www.washingtonpost.com/health/2020/04/27/six-new-coronavirus-symptoms/>
4. Starting Friday May 1, Utah will transition from a state of high risk for COVID-19 to a state of moderate risk, Gov. Herbert announced Tuesday. The transition will give the state an opportunity to open up some aspects of its economy, but it means there will still be risks to the public for COVID-19, we still need to keep social distancing and other protective measures. Source: <https://www.ksl.com/article/46746359/utah-to-lesser-covid-19-restrictions-starting-friday-state-sees-110-new-cases-4-new-deaths>
5. The Salt Lake County Health Department said it would follow Governor Herbert's recommendations for a phased-in re-opening of some businesses and loosening of some restrictions because of COVID-19. Reopening is, of course, contingent on the latest data we receive about the spread of the virus locally, and our reopening date could change if virus transmission increases in Salt Lake County. 6. Washington County Commission Chairman announced plans on April 27, to reopen for businesses on Friday, May 1, at least as much as state guidelines will allow. Director of the Southwest Utah Public Health Department said data shows it is safe to start reopening businesses there as long as some safe distancing and similar measures continue to be followed. "It's been two weeks since anyone has been hospitalized from COVID here." No one currently is hospitalized. The area had 87 active cases, 2 deaths, 58 have recovered (65% recovery rate). 7. "A Mask for Every Utahn" is a state of Utah initiative, in partnership with the Utah Manufacturers Association, to help Utahns who may not have a face mask and are returning to the workplace or going out in public. If you don't already have a face mask, aren't able to make a face mask or get one from someone else, and aren't able to purchase a face mask, please submit the form and order your mask free of charge here <https://coronavirus.utah.gov/mask/>. Current policy limits one per person, 6 or less per household.
